Collection 2022/2023

1/500 Regional Airport Series

Detailed Model Airports in A4 format

Regional Airport Series

Series of airport terminal sets and other key facilities to create various sized regional airports. All 6 sets can be combined in any way to create a layout tailored to your needs. The design of all buildings is based on the most modern airports from around the world. Their universality makes it possible to create a model of an airport located in any destination.

The series offers 3 sets with a passenger terminal, including the Small Int. Airport, which will ideally serve as a regional terminal for long- and short-haul flights. Regional Airport is a small flexible and modern airport, suitable for handling various types of air traffic. Small Reg. Airport is a small terminal which can serve as a separate airport, a terminal for domestic traffic or even a terminal for general aviation. The Cargo Terminal with catering centre, the Aircraft Service Hangar with interior and opening doors or the Remote Gates Apron are sets expanding the operational possibilities of the regional airport.

New in this collection! Length and height adjustable Jet Bridges of our own design. Each set also includes accessories for self-assembly, such as airport lights or various vehicles like fire trucks or buses.

Runway Series

Series that allows you to enlarge the airport layout with runways and taxiways. Our first 2 runways, which we divided into smaller sets, can be connected to airport modular sets and create a layout tailored to your needs.

Dimensions of key elements, markings and other details designed in accordance with principles and standards used in practice. Some dimensions and separations such as the distances between runway and taxiway axes and the entire length of the runway have been reduced for the size of the mock-up while maintaining as much realism as possible.

Runway 27/09 (code: 3E) is the widest runway capable of handling the operations of the largest aircraft. Thanks to its rapid exits and parallel taxiway it offers high capacity for traffic operations.

Runway 24/06 (code: 2C) is a standard runway which allows the operation of large aircraft.

New in this collection! We have reproduced the full runway and taxiway lighting! All kits finished with high quality model grass.

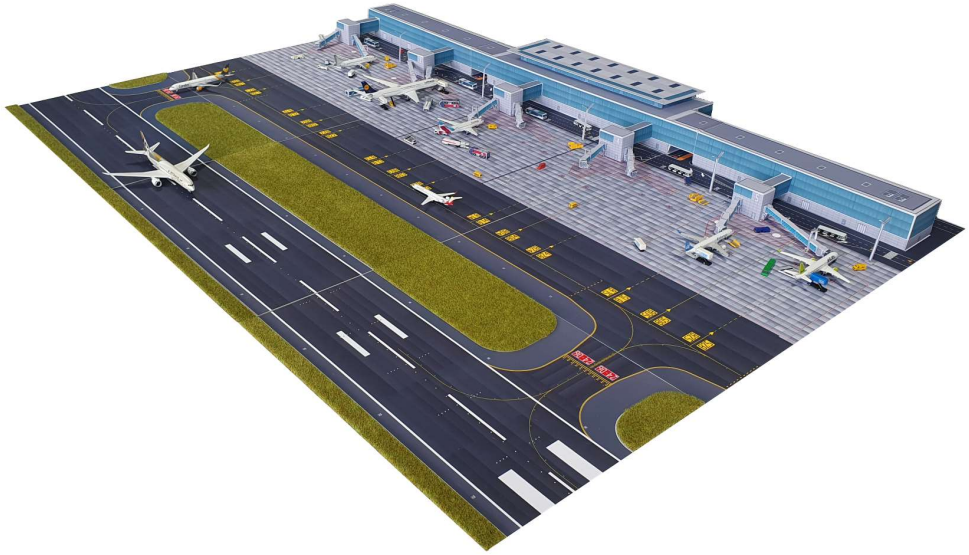
Sets can be combined to form smaller layouts. The Regional Airports Series sets may be arranged differently. The possibility of combining particular sets with others is available in the product descriptions on our website. If you have any questions, please contact us and we will help you make the best choice of sets.

The layouts shown are graphical sketches of the model airport sets. Board sections and details not visible on these graphics

1/500 Modular Series



Our proposition:

Small Int. Airport with runway

1. **Small Int. Airport (SKU:52214)**
2. **Runway 24/06 – Exit (SKU:522122)**
3. **Runway 24/06 – Extra Modules (SKU:522132)**

Size of the entire layout: 89.1 x 63.0 cm

Our proposition:

European Regional Airport

1. **Regional Airport (SKU:52218)**
2. **Cargo Terminal (SKU:52215)**
3. **Runway 24/06 – Threshold (SKU:522111)**
4. **Runway 24/06 – Exit (SKU:522121)**

Size of the entire layout: 118.8 x 63.0 cm

Model airplanes and plastic accessories are not included in the sets

A4 Airport.com

About A4Airport.com

Manufacturer of high quality model airport sets in various popular scales since 2020. Our aim was to create a practical form of mock-up that could be quickly placed on any flat surface and easily stored. The design of our model airports is carried out in accordance with all the standards for the design of real airports. We manufacture and package responsibly, minimising plastic products and using materials produced in the EU.

About our products

Layout boards - The design of the boards is printed on high quality matt photographic paper which is permanently attached to a solid cardboard base. The boards can be finished with high quality modelling grass. Joining of the boards is made by small magnets with glue, which should be sticked to the boards.

Dimensions of 1 A4 board: 29.7 x 21.0 x 0.3 cm

Cut-out and assemble buildings - Printed on high quality photographic paper and designed to be easily folded. Buildings as well as other accessories are included in the kits. Fold carefully according to the instructions.

Boards produced and packed by hand in Poland. May contain slight imperfections. Protect from water and high humidity and long sun exposition.
